

ATM Safety Tips

Use an ATM that has security cameras around it.

Do not use an ATM that is out of view or poorly lit.

Inspect the ATM for skimming devices. Look for evidence of adhesive material, extra attachments or damaged pieces.

Be timely with your transactions.

Do not count your money at the ATM location. Do so when you reach a safe destination.

When entering your PIN, use your free hand to cover your identification number.

Always take a receipt. Compare your receipts to your statements and report any fraudulent activity.
